

### **Basic Coated Electrode for Mild Steels**

#### Classification

EN ISO 2560-A: E 46 4 B 32 H10

AWS A5.1 : E7018

#### **General Description**

AS B-204 is a basic coated electrode. It is used particularly to weld rigidly restrained mass structures where high welding stresses are unavoidable. Weld metal has a high resistance to cracking. The slag is easy to remove and it gives very high quality, smooth weld beads. It has 125% metal recovery.

## **Basic Coated Electrode for Mild Steels**

#### **Applications and Materials to be Welded**

AS B-204 is suitable for steel constructions and machines operating under dynamic forces. Ship building, boiler and pressure vessel manufacturing and pipe connections are among its application areas. It is recommended for the welding of high carbon steels having high P and S content; welding of high strength ship's plate of A-, D- and E- quality and vessel plates of 17 Mn 4 and 19 Mn 5 type. AS B-204 is also suitable for welding thin plates in the small diameters.
