AS S-6010

Cellulosic Coated Electrode for Mild Steels

Classification

EN ISO 2560-A : E 42 2 C 21 AWS A5.1 : E6010

General Description

AS S-6010 is an easy to strike cellulosic coated electrode. Excellent molten pool control due to easily-removable, low-volume slag and gaseous arc shielding eliminates porosity problems in weld beads. In all positions, it enables weld beads of high penetration and it minimizes problems that frequently occur in the welding of rusty or oily steels.

AS S-6010

Cellulosic Coated Electrode for Mild Steels

Applications and Materials to be Welded

Site welding of pipe and pipelines carrying natural gas, crude petroleum or alike; ship building; storage tanks, boiler and pressure vessel manufacturing, steel and bridge constructions are among its application areas. AS S-6010 can be used in applications requiring high penetration. It can be used for root and deposition pass and also for pipe connections of 5LX46 grade line pipes.
